

Professor Pickelbottom's
GALACTIC JUMBLES

Astronauts travel beyond Earth to explore the mysteries of space. Out there, there's no air to breathe and no gravity to hold you down! Every step, twist, and turn is like floating in slow motion.

Use your astronaut skills to solve the maze and find your way back to the spaceship!

DID YOU KNOW?

In space, astronauts grow about 5 cm taller because there's no gravity pulling down on their spine!
